Djamaloudine Ouro Agbandjala

Data Science & AI/ML Graduate Student | SDET Automation & LLM Evaluation

Sterling, VA | 703-870-1398 | djamalsoc@gmail.com | linkedin.com/in/djamal-ouro-agbandjala2000 | github.com/djamalsoc-2000 | Green Card Holder

PROFESSIONAL SUMMARY

Graduate student pursuing an M.S. in Data Science and Analytics (AI & Machine Learning) at Old Dominion University, with 4+ years of IT experience spanning SDET automation, cloud solutions, and AI model evaluation. Hands-on with Python, Java, Selenium, SQL, and AWS, with a track record of automating CI/CD pipelines, improving system reliability, and delivering data-driven insights. Currently an AI Analyst and AI Trainer evaluating LLM outputs and reviewing AI-generated code, following an SDET automation internship building Jenkins-integrated test frameworks. Strong communicator with a teaching and mentoring background, seeking machine learning engineering, AI evaluation, and SDET roles.

EDUCATION

Master of Science, Data Science and Analytics: AI and Machine Learning **Aug 2026 – Jul 2028**
Old Dominion University | Coursework: CS 620 Introduction to Data Science, CS 625 Data Visualization

Computer Science Coursework **Aug 2025 – Apr 2026**
Northern Virginia Community College

Bachelor's Degree, Applied Mathematics **Aug 2018 – Jul 2022**
University of Kara, Togo (WES Evaluated, U.S. Equivalent Approved)

CORE SKILLS

- SDET Automation: Selenium, Cucumber (BDD), TestNG/JUnit, PyTest, Jenkins CI/CD
- Programming & Cloud: Python, Java, SQL, AWS (EC2, S3, IAM)
- Data & AI: Pandas, NumPy, Scikit-Learn, model evaluation, prompt design, red-teaming, code review; Tableau, Observable, Vega-Lite, OpenRefine; exploring agentic AI (Model Context Protocol)
- Other: Agile/Scrum, Git/GitHub, JMeter, Postman

PROFESSIONAL EXPERIENCE

AI Quality & Evaluation Specialist — *Snorkel AI (Remote)* **2026 – Present**
- Assess and rate LLM outputs for accuracy, reasoning quality, and adherence to detailed guidelines.
- Write structured quality feedback that guides model improvement.

AI Analyst — *Turing (Contract, Remote)* **Aug 2026 – Present**
- Evaluate and rate AI model outputs for accuracy, coherence, and factual reliability across technical domains.
- Provide structured feedback to guide model fine-tuning and improve response quality.

AI Trainer & LLM Evaluator — *Handshake (Remote)* **Apr 2026 – Present**
- Analyze model reasoning and factual precision to fine-tune outputs for improved accuracy.
- Review AI-generated code for correctness and quality, and write clear feedback on LLM alignment.
- Develop domain-specific prompts and scenarios to train models on complex technical challenges.
- Engage in red-teaming and edge-case testing to strengthen model reliability and safety.

Software QA Automation Intern — *Infotek Solutions Inc. (Remote)* **Jan 2026 – Jun 2026**
- Integrated test execution triggers into CI/CD build pipelines using Jenkins for immediate feedback on build health.
- Participated in daily standups and sprint planning, managing bug life cycles from discovery to closure in Jira.
- Built technical expertise in Java, Selenium, Cucumber, and CI/CD practices for software testing.

Mathematics & Computer Science Teacher / IT Services Manager — *All School* **Sep 2021 – Jun 2024**
- Taught Mathematics and Computer Science, developing lesson plans and mentoring students in programming and problem-solving.
- Used Python (pandas) and SQL to analyze system logs, increasing system reliability and reducing downtime.
- Automated IT security checks with Python, strengthening security posture.

Tech & Wi-Fi Services Manager / Antenna Technician — *IBRO WIFI* **Jul 2020 – Jun 2024**
- Installed and configured satellite antennas and Wi-Fi equipment; managed maintenance, troubleshooting, and network optimization.

TECHNICAL PROJECTS

Customer Churn Prediction — Predictive Analytics *(github.com/djamalsoc-2000)*
- Built an end-to-end Python pipeline (Pandas, NumPy) to clean and process a customer dataset, handling missing values and skewed features.
- Performed EDA and built a Logistic Regression classifier (Scikit-Learn, 80/20 split), evaluated with classification metrics suited to imbalanced data such as precision-recall.
- Identified tenure, contract length, and monthly charges as the top churn predictors.

Software Review & Bug Fix — Datacom Job Simulation (Forage) **Oct 2026**
- Tested a React/JavaScript web app against customer feedback and wrote a prioritized bug and feature report.
- Used browser DevTools to trace an error to its root cause (coordinates passed as [lat, lng] where MapLibre expects [lng, lat]), fixed it, and verified the fix.
